PIPELINE REHABILITATION

UV-GRP | RELINE AMERICA, INC.

WHO IS RELINE AMERICA?

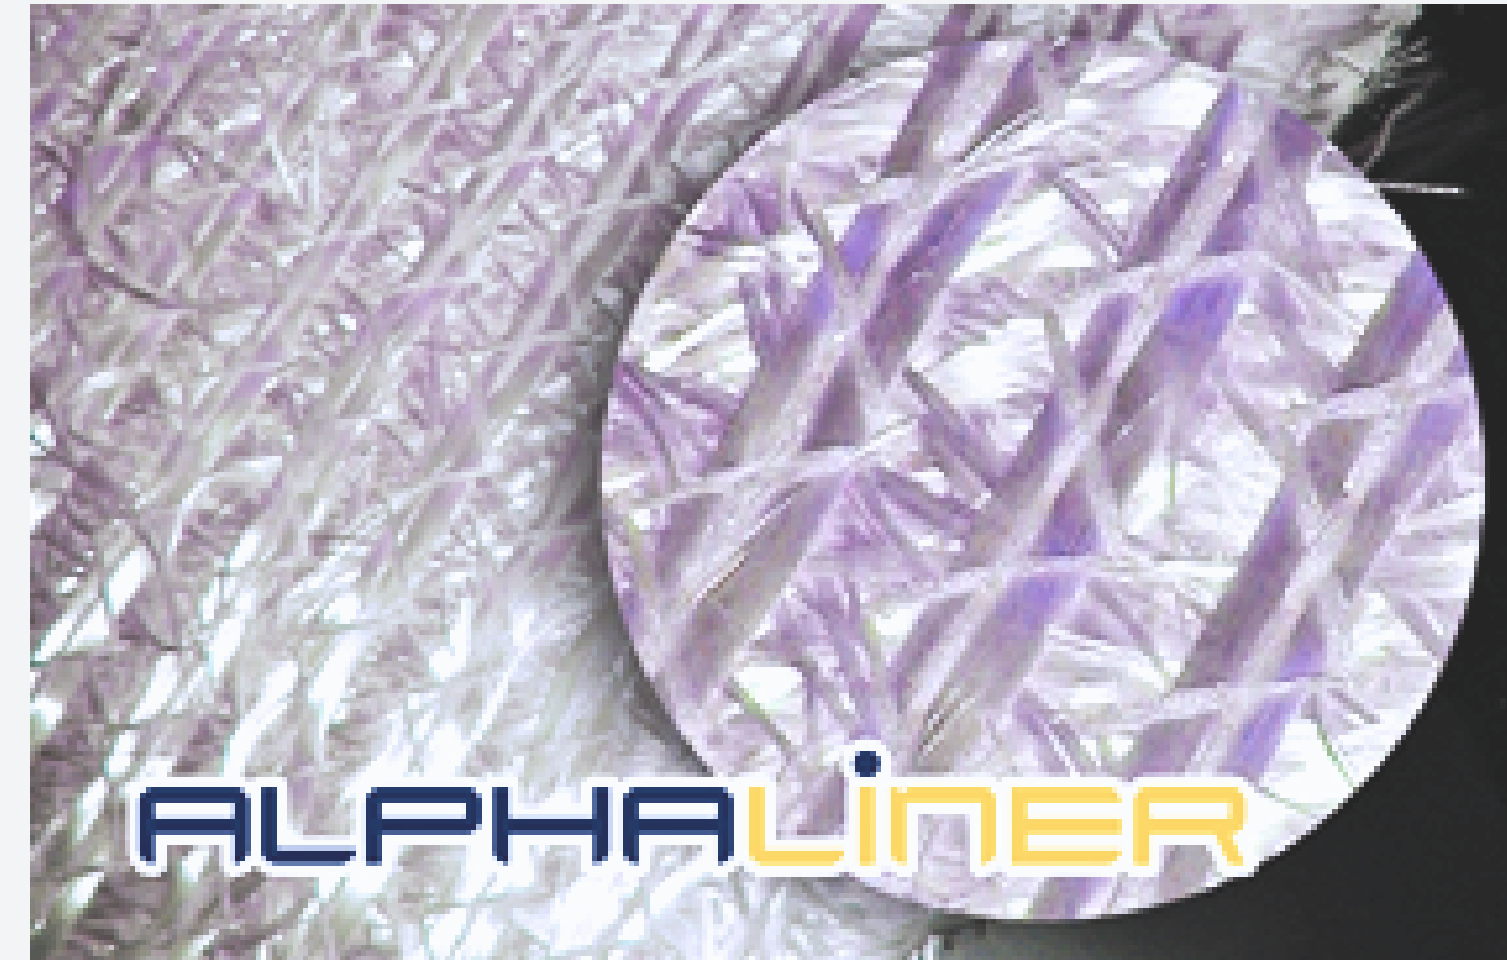

Reline America is the leading North American manufacturer of UV GRP liners with more than 12 million feet installed globally and over two million feet installed in North America – and counting.

- + Our specially trained team can bring new life to aging or deteriorating pipeline infrastructure.
- + ALPHALINER® is a UV-cured fiberglass reinforced pipe that is engineered to rehabilitate failing pipes and culverts of all shapes and sizes.

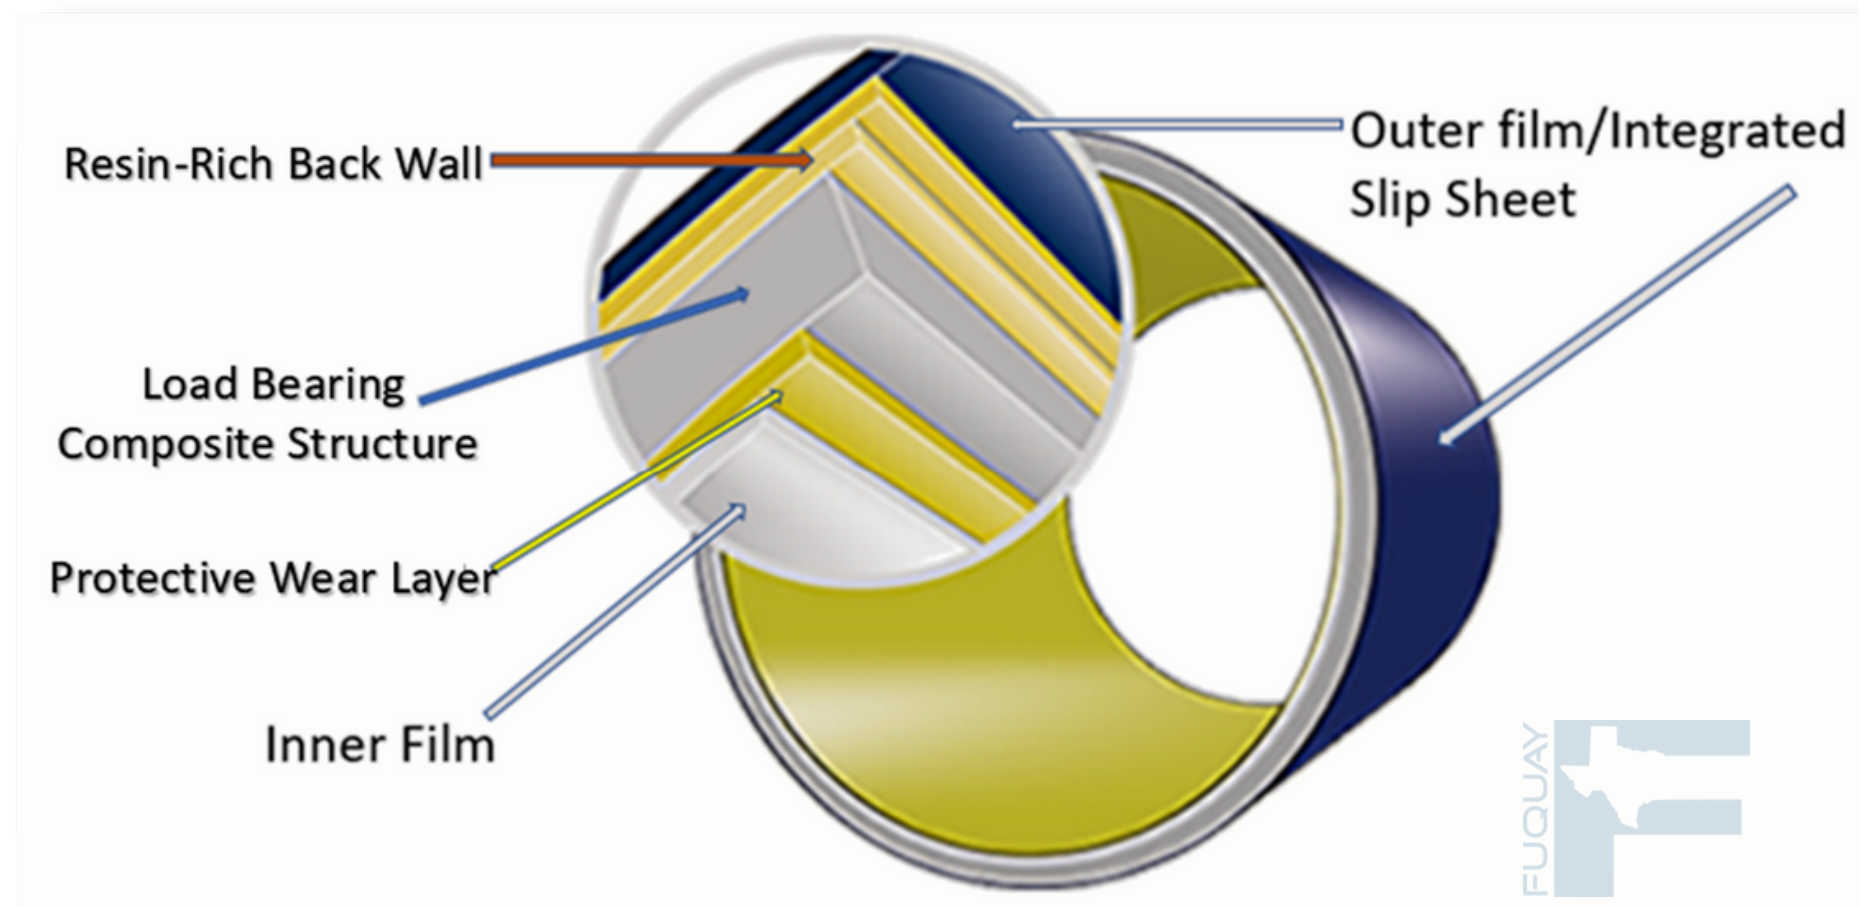

LINER CHARACTERISTICS

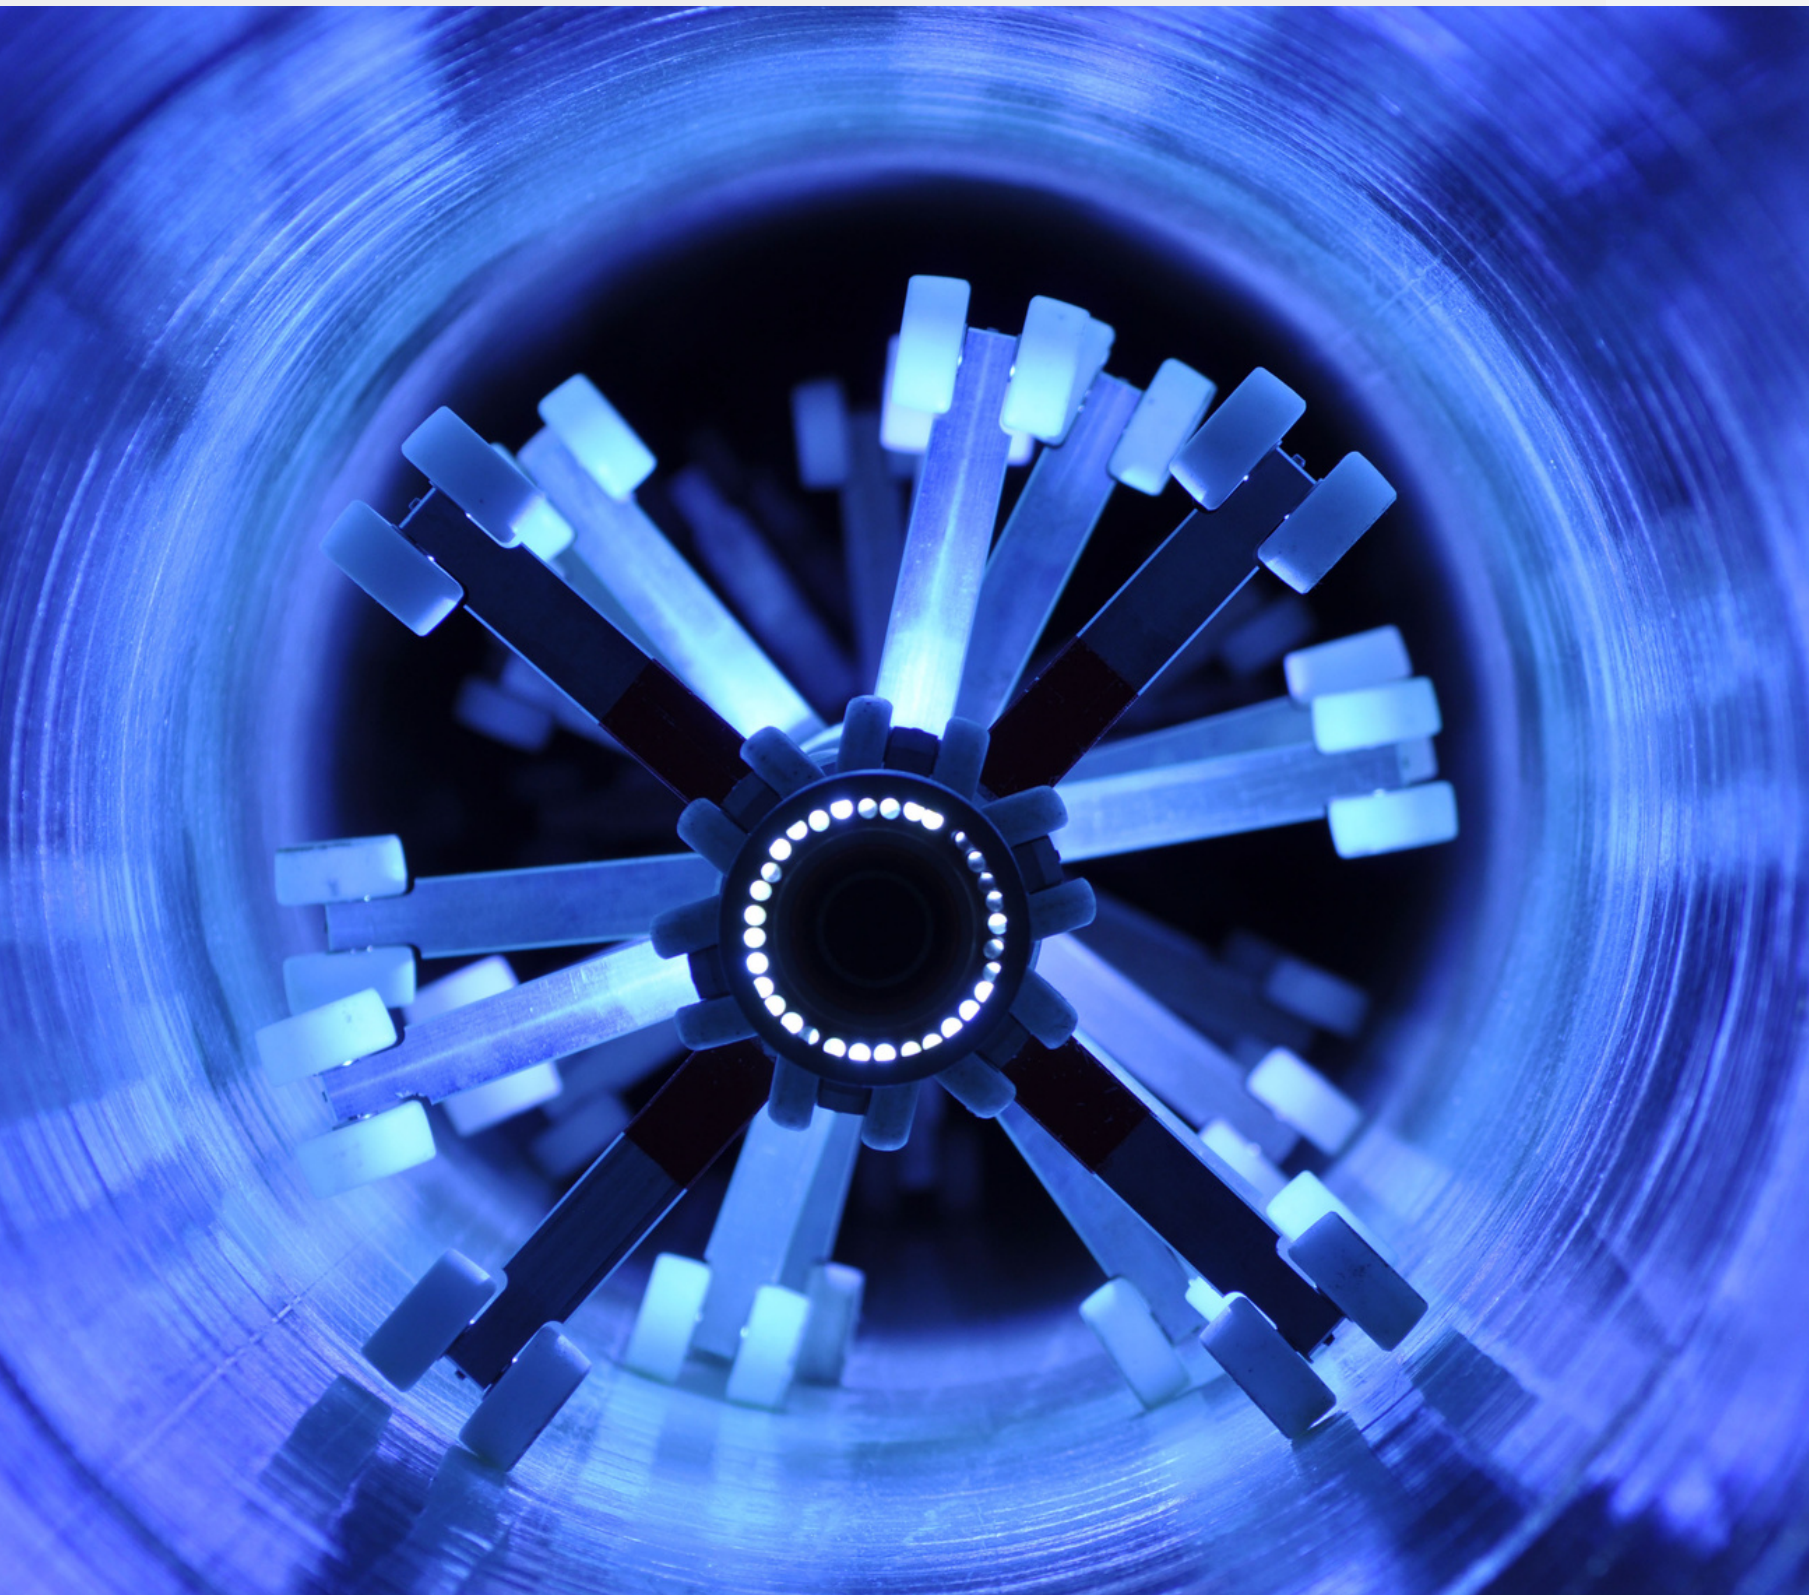

- + **Fiberglass Reinforced**
 - Resin-saturated fiberglass; no joints
 - Inner film
 - Outer foil provides extra protection from:
 - UV light
 - Offsite joints or protruding pipe
 - Contact with water or contaminants
 - Styrene containment

MADE THE SAME

- + 50+ year lifespan
- + No job site wet-out
- + Pipeless integrity
- + Smaller environmental footprint
- + Asset protection
- + Eliminates resin drain

ALPHALINER ADVANTAGE

- + Storm & Wastewater Pipes
- + 6" to 60" Diameter Pipes
- + Various Geometries
- + Up to 1000' run from access
- + Requires access at both ends
- + 5-8% Radial Expansion
- + Can handle High-Impact Loads
- + Provides full structural integrity
